AI Fluency

Understand the tools shaping the next decade - and use them with judgement.

Maîtrise de l'IA

NEXT COHORT	SCHEDULE	DURATION	SEATS LEFT
18 April 2026	Sunday 10:00–13:00	8 weeks	8

WHAT YOU WILL BUILD

- Explain how large language models generate and miss information.
- Write effective prompts for a defined creative or study task.
- Identify bias, hallucination and privacy risks in AI output.
- Build a small project that uses AI responsibly.

SYLLABUS OUTLINE

01 How AI works
Patterns, predictions and the limits that explain confident mistakes.

02 Prompt craft
Context, constraints and iteration: writing prompts that can be checked.

03 Creative studio
Image, text and sound tools explored through a small creative brief.

04 Responsible use
Bias, privacy and attribution - the questions to ask before publishing.

05 Study and work
Use AI as a thinking partner without outsourcing the thinking.

06 Project clinic
Build, critique and present a small project that uses AI deliberately.

CAPSTONE & STUDENT OUTPUT

An AI-assisted project

A small researched or creative project with a written account of every AI tool used, its output and its limits.

STUDENT OUTPUT
A documented AI workflow, an evaluated prototype and a responsible-use brief.
