Technical English

The English you need to explain a build, write a spec and hold your ground in a technical conversation.

Anglais technique

NEXT COHORT	SCHEDULE	DURATION	SEATS LEFT
18 April 2026	Wednesday 17:00–19:00	12 weeks	9

WHAT YOU WILL BUILD

- Describe a system, process or prototype in precise spoken English.
- Write short technical documentation with a clear structure.
- Present a project and answer questions without reading from a script.
- Use technical vocabulary accurately in everyday professional contexts.

SYLLABUS OUTLINE

01 Technical register
Choosing precise verbs, quantities and qualifiers for engineering work.

02 Describing systems
Explain how a system is built and what limits its performance.

03 Documentation
Write short specs, READMEs and instructions a stranger could follow.

04 Presenting a build
Shape a five-minute technical presentation and rehearse difficult questions.

05 Meetings and collaboration
Clarify, disagree and negotiate scope in professional English.

06 Portfolio clinic
Review the written and spoken work produced across the programme.

CAPSTONE & STUDENT OUTPUT

A technical presentation and written brief

A five-minute presentation and a one-page technical brief, delivered in front of the cohort.

STUDENT OUTPUT
A technical presentation, a written report and a mock client briefing.
